Wong Zi Yu, Codie

hfyzw7@nottingham.edu.cn

I am a University of Nottingham student interested in software development and artificial intelligence. I enjoy exploring new ideas and creating software that is useful and easy to use.

PROJECTS

01

Internship Result Management System

WEB APPLICATION · PHP / MYSQL / JAVASCRIPT / HTML / CSS

A database-backed web application for managing internship records, placements and assessment information, with user roles and structured data management.

Student and internship records · **Lecturer/supervisor assignments** · **Assessments and activity logs**

02

A4 Paper Detection

ARTIFICIAL INTELLIGENCE · PYTHON / OPENCV / A* / BFS

Exploring search-based detection of A4-paper corners in photographs with varied backgrounds, lighting conditions and partial occlusion.

Image preprocessing · **BFS and A* search** · **Heuristic comparison**

03

Toxic Word Detection

C PROGRAMMING · FILE I/O / STRING PROCESSING

A text-processing program that reads input files, identifies predefined toxic words or phrases, and analyses their occurrence frequency.

Text-file processing · **Keyword matching** · **Frequency analysis**

TECHNICAL SKILLS

PROGRAMMING

Python, Java, C, PHP, JavaScript, SQL

WEB & DATA

HTML, CSS, MySQL, relational databases, CRUD

SOFTWARE PRACTICE

Git, object-oriented programming, debugging, testing
